

Record Sheet 18A

Guidelines and Conditions for Use of Digestate

(To be supplied with dispatch note, Record sheet 18)

This form is the paper version of information that can also be entered on the Webtool computer programme, which can be accessed on <http://www.qualitcompost.org>. It is strongly recommended that the webtool is used; it is easy to use and automatically gives valuable additional information such as a benefit statement.

Please be aware the following is required for compliance with the Quality Protocol Appendix F and G.

When quality digestate is to be used in agriculture or forestry and soil/field-grown horticulture, the details in the following list must be kept by the land manager and made available or given to the quality digestate producer or certification body.

Records to be kept by the land manager and made available to the quality digestate producer and certification body	
Parameter	Format
Quantity of quality digestate received	Tones / m ³
Quality digestate assessment/ certification code	Numerical
Date of dispatch from the AD plant	dd/mm/yyyy
Typical quality digestate PTE concentration (provided by the quality digestate producer)	Mg / Kg
Initial soil PTE analysis	Mg / Kg weight
Calculated PTE content (based on all subsequent additions of quality including this years)	Mg / Kg dry weight
Soil nutrient analysis	Mg / Kg dry weight
Quality digestate analysis	Typical or actual
Date of application	dd/mm/yyyy
Rate of application	Tonne / ha fresh weight
Area over which quality digestate applied	Ha
Incorporation depth	Cm
Total quantity of quality digestate applied	Tonnes / m ³
Location of application	-Eight figure grid reference (e.g. Tm12345678) for the centre of the area(s) to which the digestate is applied - Farm grid reference number (a main building or farm gate).
Entry into Webtool for Quality Digestate	Date, if applicable
