

Technical Report - End of Waste Criteria – 2nd Working Document - 11th October 2011 – Additional Wastes for Positive List

No:	EWC Code of waste for addition to list	Description	Comment	Suggested By
1	02-06-03	Confectionary Industry – Sludges from on site effluent treatment.	We are taking this waste currently from a confectioner, the waste has a very high COD value and contains Sugar and Vegetable fat and is valuable feedstock	Operator 1
2	07 07 12? Not sure	Starch – derived from a pharmaceutical by-product	Currently being used as an animal feed additive	Operator 2
3	02 03 04? Not sure	syrup from bioethanol production	Could be be available to AD plants (as opposed to glycerol from biodiesel)	Operator 2
4	02 02 01 02 02 04 02 05 02 02 06 03			Operator 3

Technical Report - End of Waste Criteria – 2nd Working Document - 11th October 2011 – Additional Wastes for Positive List

	02 02 99 02 03 02 02 05 02 02 06 03 19 06 04 19 08 05 19 08 09 20 03 02		These are all wastes which are at present included in ADQP list but missing from JRC	Operator 4
5	02 02 02		Confirm that this is the right category for blood	Operator 5
6	19 02 09	Glycerin		Operator 5
7	02 03 01	Coffee		Operator 5
8	19 05 99	Compost site leachates	Not in ADQP	Operator 5
9	02 07 05	Coca Cola	Not in ADQP or CQP	Operator 5
10	02 02 03	Pet Food Washings	Not in EoW	Operator 5
11	02 04 01 02 04 02		General observation: In related to EoW criteria seems more close with composting plant rather	Operator 6

	<p>02 04 03 02 04 99</p>		<p>than anaerobic digestion especially on food waste anaerobic digestion. For example waste from Sugar processing (02 04)</p> <p>EoW only allowed code 02 04 01 & 02 04 02 which is washing soil from sugar beet and potato processing and lime stone dust which are suitable for composting not for AD plant.</p> <p>While ADQP allowed 02 04 03 and 02 04 99 which are biological sludge (onsite effluent treated) and other biodegradable materials which are suitable for energy extraction. This EWC code are not allowed under EoW.</p> <p>If the EoW criteria are accepted we would not be able to accept those kind of wastes, and would lose potential customers which is difficult time for us.</p>	
<p>12</p>			<p>A general comment was that in the WRAP comparative list of wastes , many of the already</p>	<p>Operator 7</p>

Technical Report - End of Waste Criteria – 2nd Working Document - 11th October 2011 – Additional Wastes for Positive List

			allowable wastes were omitted from the Scottish list. She requests that everything on that list plus any Scottish anomalies will be included.	
13	19 08 09 19 08 12 20 01 08 20 01 05		Grease etc. Industrial waste water Biodegradable kitchen & canteen waste ?	Operator 7
14		Household sewage	A strong comment was that local domestic sewage should be allowed in order to encourage community schemes. This would be from septic tanks or local sewage pipes laid specifically for the biogas plant.	Several small operators
